About Me

I'm a passionate front-end developer with a strong focus on creating smooth, engaging user experiences. I enjoy working with vector graphics and prefer a clean, minimalist approach in my code. With solid skills in HTML, CSS, and JavaScript, I'm excited about bringing design ideas to life and turning them into seamless, interactive web experiences.

Skills

- Language: C | C++ | Python.
- Front End: HTML | CSS | Tailwind CSS | Bootstrap | Java Script.
- Wordpress | Figma
- Others: Data Structure | Algorithms.

Work Experience

- Developed Dynamic Websites: Created interactive, user-friendly websites using WordPress, HTML, CSS, and JavaScript to enhance user engagement and accessibility across all devices.
- Customised WordPress Themes and Plugins: Built and customised WordPress themes and plugins to suit client requirements, optimising functionality and streamlining the user interface.
- Optimised Website Performance: Improved page load speeds and SEO by optimising code, compressing images, and applying best practices in web development.

Project

- Created clear, developer-focused code with HTML, CSS, JavaScript, and WordPress.
- Developed reusable, scalable components that give developers and users a smooth, responsive experience.
